🔧 Techanical Skills

- .NET Core MVC
- .Net Core APIs
- .Net Framework
- Entity Framework
- SignalR, APIs
- C#, LINQ
- VBA
- Dapper
- SQL Server
- MySQL
- PostgreSQL
- Basic React Js
- HTML5, CSS3, Bootstrap, JavaScript
- Git, SVN
- IIS, Github Pages

👥 Soft Skills

- Team Collaboration
- Problem Solving
- Adaptability
- Accountability
- Self-Motivation

🔠 Languages

- English
- Hindi
- Gujarati

👤 About Me

.NET Core Full Stack Developer

I am a dedicated Full Stack .NET Developer with over 3 years of experience in designing and developing enterprise-grade web applications. My skill set spans the entire development lifecycle — from crafting robust backend APIs to building intuitive frontend interfaces. I specialize in ASP.NET Core, MVC architecture, RESTful API development, and real-time communication using SignalR. I am passionate about writing clean, scalable, and maintainable code that delivers real-world value and performance. I thrive in collaborative environments and continuously seek to improve both technically and professionally.

💼 Experience

Junior Developer – Microvista Technologies Pvt. Ltd (APR-2023 – Present)
- Integrated and consumed RESTful APIs to enhance application functionality and data flow.
- Led both frontend and backend tasks, contributing to the end-to-end delivery of key features.
- Optimized application performance and ensured code quality through structured development practices.

🎓 Education

B.Tech – Silver Oak University 2022 – 2026 (Pursuing)
Graduated with Computer Engineering.

📁 Projects(Selft-Created)

E-Commerce Platform: A full-featured online store with product listings, user authentication, cart, and order management. Built using ASP.NET Core MVC with SQL Server and Bootstrap responsive UI.

Real-Time Chat Application: Implemented a web-based chat app using SignalR for real-time communication. Includes user presence tracking, private/public messaging, and a clean, modern UI.

Portfolio Website: A fully responsive personal portfolio built with HTML, CSS, and JavaScript. Showcases projects, resume, and contact information with Email JS.

Task Management System: Designed a multi-user task tracker with roles, deadlines, and status filters. Built with ASP.NET Core MVC and Entity Framework for a scalable and maintainable backend.

🗂 Projects(Privious Company)

Annual and Periodic Submission System: Developed a system where users input data via Excel, which is converted to XML for submission. The system validates the XML against predefined rules and generates dynamic HTML reports for review data.

Automation Penalty System: Built an automated penalty engine that calculates penalties based on submission types, delays, compliance issues, resubmissions, and reminders. It triggers alerts and sends email notifications to stakeholders.

Single Filing API: Created a secure API to facilitate submission flow between different exchanges such as BSE and NSE. Ensures consistent data handling and standardized communication across platforms.

Admin Dashboard: Designed an admin panel displaying submission reports, MIS data, and member activity. Includes export functionality for Excel and PDF, providing insightful overviews for compliance tracking.

🏆 Achievements

Employee of the Month – March 2024
Recognized for outstanding performance and contributions to team success at Microvista Technologies.

Emerging telent of 2023-24
Awarded for exceptional skills and potential in software development, demonstrating a strong commitment to learning and growth.
