TECHNICAL SKILLS

BACKEND & FRAMEWORKS

- ASP.NET Core MVC
- .NET Core APIs
- ASP.NET Web Forms
- Entity Framework
- ADO.NET
- Dapper
- SignalR

ARCHITECTURE

- MVC Pattern
- REST Architecture
- Repository Pattern
- Clean Architecture
- Microservices (Basic)

LANGUAGES

- C# & LINQ
- JavaScript
- VBA

FRONTEND

- React JS
- HTML5 & CSS3
- Bootstrap

DATABASES

- SQL Server
- MySQL
- PostgreSQL

DEVOPS & TOOLS

- Git
- SVN
- IIS
- GitHub Pages
- Azure DevOps
- CI/CD

SOFT SKILLS

- Team Collaboration
- Problem Solving
- Adaptability
- Accountability
- Self-Motivation

LANGUAGES

- English
- Hindi
- Gujarati

ABOUT ME

Dedicated **.NET Full Stack Developer** with **3+ years of professional experience** at Microvista Technologies Pvt. Ltd., specialising in enterprise-grade web applications across the full development lifecycle. Proficient in ASP.NET Core MVC, RESTful API development, SignalR real-time communication, and multi-database environments including SQL Server, MySQL, and PostgreSQL. Passionate about writing clean, scalable, and maintainable code while continuously growing technically and professionally.

EDUCATION

B.Tech in Computer Engineering

Silver Oak University, Ahmedabad

CGPA: 9.46 / 10

EXPERIENCE

Junior .NET Developer — Microvista Technologies Pvt. Ltd.

📅 April 2023 – Present | Ahmedabad, Gujarat

- Designed, developed, and consumed **RESTful APIs** to enhance application functionality and streamline data flow across modules.
- Led end-to-end delivery of key features across **frontend (HTML/CSS/Bootstrap/JS)** and **backend (ASP.NET Core, C#, EF Core)**.
- Built an **XML-based submission and validation engine** integrated with dynamic HTML report generation for regulatory compliance.
- Developed an **automated penalty calculation engine** with email notifications, reducing manual compliance effort significantly.
- Implemented a **Single Filing API** to standardize data communication between BSE and NSE exchanges.
- Optimised SQL queries and application logic, improving overall **system performance and code maintainability**.

PROJECTS (SELF-CREATED)

E-Commerce Platform

ASP.NET Core MVC | SQL Server | EF Core | Bootstrap | jQuery

Developed a full-featured e-commerce web application with secure user authentication, product catalog management, shopping cart, wishlist, order placement, payment workflow, invoice generation, and order tracking functionality. Implemented admin panel for managing products, categories, users, inventory, and reports with responsive UI and optimized database operations for better performance and scalability.

Real-Time Chat Application

ASP.NET Core | SignalR | SQL Server | JavaScript | Bootstrap

Built a real-time messaging application similar to WhatsApp using SignalR with one-to-one chat, online/offline user status, typing indicators, unread message count, message delivery/read status, and notification support. Designed responsive chat UI with authentication, user management, connection requests, and scalable architecture for real-time communication.

Task Management System

ASP.NET Core MVC | EF Core | SQL Server | Bootstrap | DataTables.js

Designed and developed a multi-user task management system with role-based access, task assignment, priority management, deadlines, status tracking, file attachments, dashboard analytics, and advanced filtering. Implemented clean architecture, repository pattern, dependency injection, and responsive UI for maintainability and scalability.

Dynamic CRM System

ASP.NET Core MVC | Dapper | SQL Server | Bootstrap

Created a dynamic CRM application with customer management, lead tracking, follow-up management, reporting dashboard, and role-based permissions. Developed reusable modules, dynamic menu management, AJAX-based forms, and responsive UI with optimized SQL queries for better performance.

PROJECTS (PREVIOUS COMPANY)

Half-Yearly & Annual Filing Submission System

ASP.NET Web App | JSON | SQL Server | JavaScript

Developed a dynamic filing management system for half-yearly and annual compliance submissions with JSON-driven form generation, dynamic field configuration, document uploads, workflow management, and validation mechanisms. Implemented maker-checker approval flow, observation tracking, and automated HTML generation for flexible form rendering and data processing.

Automation Penalty System

C# | SQL Server | Windows Service | Email Service

Designed and implemented an automated penalty calculation engine for compliance delays and filing issues. Developed scheduled background services to calculate penalties, generate reports, trigger email notifications, and maintain audit logs for tracking and monitoring activities.

Single Filing API

.NET Core API | REST API | JSON | JWT Authentication

Developed secure REST APIs to integrate and synchronize submission processes between exchanges. Implemented authentication, request validation, structured JSON handling, exception logging, and standardized response mechanisms to ensure secure and reliable communication between systems.

Admin Dashboard & MIS Reporting System

ASP.NET Core MVC | EPPlus | SQL Server | Bootstrap | DataTables.js

Built an advanced admin dashboard with MIS reporting, analytics, member activity tracking, submission monitoring, and Excel/PDF export functionality. Implemented dynamic filters, graphical reports, pagination, role-based access control, and responsive UI for effective operational monitoring and reporting.

ACHIEVEMENTS

Employee of the Month

Recognized for outstanding performance and key contributions to team success.

March 2024 | Microvista Technologies Pvt. Ltd.

Emerging Talent of the Year

Awarded for exceptional skills and strong commitment to learning and growth in software development.

2023–24 | Microvista Technologies Pvt. Ltd.
